DIA WALK

GEL HEEL SOCKS

HELPS TO ELIMINATE
DRY, CRACKED HEELS
in Just Days

OVERNIGHT TREATMENT
Odourless | Hypo-allergenic | Washable

Gel cup

By Locking in moisturizing creams and lotions, the polymer Gel Cup maximizes the softening / healing process.

Care

Wash by hand carefully, drip dry for 12 hours, Do not wring out, Do not bleach. To clean inner polymer cup, turn heel sock inside out, apply soap and water to wash cloth, rub gel cup gently and let dry.

The Unique polymer gel heel cup forms an occlusive seal to lock in moisturizers. In just days, rough, dry, cracked heels will be smoother and softer to the touch. The polymer gel cup is odorless, non-toxic and hypo-allergenic. Wear gel socks at bedtime and with shoes.

Uses

- Prevents Cracked heels
- Prevents Dry heels
- Reduces heel pain
- Suitable for Diabetics
- Can be winter foot care

Contents

Sock: 75%, Cotton: 20%, Polyest: 3%,
Rubber: 2%, Spandex GEL: 100% TPR

- Non-constricting & Mild gradient compression design keeps the socks in place to prevent sliding
- Additional padding- Provides extra comfort and reduces friction
- Feet covered with Anion TPR - Gel - Anion advances blood circulation, Gel moisturizes skin
- **Contents**
Cotton 80%, Spandex 20%
- **Color:** White
- **Size:** Free Pairs

ORWALK

ORTHOPEDIC FOOTCARE

Specially designed to support the position of the foot

- Reduces friction, absorbs shocks.
- Unique 3/4 length allows extra toe room
- Helps stabilizing the foot.
- Provides overall foot comfort.

Orthotic Arch Support

Arch support are commonly confused with an alternative foot product called “insole”, which offer added padding for shock absorption. By contrast, arch supports have a polypropylene shell that is flexible enough to provide comfort and rigid enough to support arches properly and restore foot structure to anti-rigid shell can be customized to fit individual feet structure using a medical foot casting system, or generic shape. Sizes can be purchased based on foot size and arch height. In either case, the intent of an arch support is to support and control the muscles, ligaments and plantar fascia to prevent fatigue and strain due to hyperextension.

Orwalk Orthotic Arch Support is made of special material & specially designed to support position of the foot.

Conditions that may benefit from shoe inserts:

- Arch strain and pain
- Heel pain
- Calluses
- Back pain
- Crooked toes and corns
- Weak ankles
- Neck Pain
- Knee pain
- Ball of foot pain (metatarsalgia)
- Overpronation
- Shin Splint
- Plantar fasciitis

Washing Instructions: Hand wash, do not dry clean or place in dryer.

Suggestion: Remove at least once in a day. Keep in open air for few minutes & dust with talcum powder before reusing.

Warning:
If rash or irritation occurs,
discontinue use and consult
your doctor immediately.

SIZE: SHOE SIZE

SMALL	3 - 4
MEDIUM	5 - 7
LARGE	8 - 10

ARCH SUPPORT

VASYLI MEDICAL GRADE

Orthotic Base

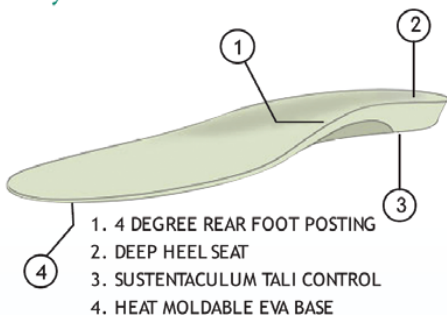

Peripheral neuropathy, in conjunction with plantar shear forces and pressure are known to be the primary causes of **ULCERATION** in patients with diabetes.

The **Vasyli-Armstrong® Diabetic orthotic** addresses the key problem areas for the diabetic foot – shearing / friction and pressure. By utilizing patented **Glidesoft® technology**, this unique combination of construction and materials has been scientifically shown to reduce shear pressures by over 50% and the onset of plantar ulcers by over 70%, compared to conventional diabetic insoles.

The dorsal surface of the Vasyli-Armstrong orthotic moves with the plantar surface of the foot. This dramatically reduces shearing/frictional forces. This in-turn assists in the reduction of skin lesions and the potential for infection/ulceration.

Unique Material Combination

Vasyli Medical Grade Orthotic Base

1. Outlast® constant temperature material cover
2. Plastazote layer (heat moldable and 100% plantar surface contact)
3. Shock absorbing layer
4. Teflon® layer
5. EVA base layer (heat moldable)

VASYLI CUSTOMS

Low Density

Ideal for elderly, diabetic and arthritic patients who require special consideration. Patients adapt easily to the mild functional control while the correct biomechanical position is maintained. Available in 3/4 and full length models.

Sizes: Kids Sm, Kids, XS, S, M, L, XL and XXL

Medium Density

Designed for the "average" patient with general orthotic needs, blue density orthotics provide excellent biomechanical control. Available in 3/4 and full length models.

Sizes: Kids Sm, Kids, XS, S, M, L, XL and XXL

High Density

Designed for high performance, this range provides both durability and solid biomechanical control. Red, high performance orthotics are ideal for athletes, high activity users and overweight patients. Available in 3/4 and full length models.

Sizes: Kids Sm, Kids, XS, S, M, L, XL and XXL

WALK PAIN FREE ORTHOTIC INSERTS

Regular

- Relives pain
Associated with*
 - Plantar Fasciitis
 - Achillies Tendonitis
 - Heel Spurs
- $\frac{3}{4}$ design to fit most shoes

Size: S, M, L & XL

Workforce

- Ideal for people on their feet all day
- Helps to relieve aches and pain that cause fatigue and stress*

Size: S, M, L & XL

Shock Absorber

- Unique shock absorption and biomechanical control
- Ideal for use in sports and walking shoes

Size: S, M, L & XL

Gel Heel Device

- Relieves Pain
Associated with*
 - Plantar Fasciitis
 - Heel Spurs
